

Lawton Fitness PWA — Setup Guide

Files in this folder

- `index.html` — The full app (all-in-one)
 - `manifest.json` — Makes it installable as an app
 - `sw.js` — Service worker (offline support)
 - `icon-192.svg` — App icon (home screen)
 - `icon-512.svg` — App icon (large)
-

Step 1 — GitHub (2 minutes)

1. Go to **github.com** and sign in (or create a free account)
 2. Click the **+** icon → **New repository**
 3. Name it: `lawton-fitness`
 4. Set it to **Public**
 5. Click **Create repository**
 6. Click **uploading an existing file**
 7. Drag ALL 5 files from this folder into the upload area
 8. Click **Commit changes**
-

Step 2 — Vercel (2 minutes)

1. Go to **vercel.com** and sign in with your GitHub account
2. Click **Add New Project**
3. Find and select your `lawton-fitness` repository
4. Click **Deploy** (no settings to change)

5. Wait ~30 seconds — you'll get a URL like `lawton-fitness.vercel.app`

Step 3 — Install on your iPhone

1. Open **Safari** on your iPhone (must be Safari, not Chrome)
2. Go to your Vercel URL (e.g. `lawton-fitness.vercel.app`)
3. Tap the **Share button** (box with arrow, bottom of screen)
4. Scroll down and tap **"Add to Home Screen"**
5. Name it **Lawton Fitness** → tap **Add**

✅ Done — it's now on your home screen like a real app!

Your Login PIN

- **Owner (you):** `1234` — change this in `index.html`, search for `OWNER_PIN`
- **Jamie Clarke:** `1111`
- **Sarah Patel:** `2222`
- **Marcus Lee:** `3333`

To change your PIN: open `index.html` in any text editor (even Notepad), find the text `OWNER_PIN = "1234"` and replace `1234` with your chosen PIN. Then re-upload the file to GitHub — Vercel will update automatically.

Sharing with clients

Give each client your Vercel URL and their PIN. They open it in Safari and add it to their home screen too. Their data stays completely separate from yours.

Making changes

To update the app (new features, appearance changes):

1. Ask Claude to update the app

2. Download the new `index.html`
3. Go to your GitHub repo → click `index.html` → click the pencil (edit) icon
4. Delete all content, paste the new content, commit
5. Vercel deploys the update automatically in ~30 seconds
